## Neurodiversity-Affirming Care

**Dates:** September 26, 2025

**Time:** 10:00am – 5:00pm

**CEU:** 6 hours

**Location:** Virtual\*

**Cost:** \$180

[Registration Link](#)

*\*Zoom link will be provided 72 hours before the start*

### **Audience:**

This course is ideal for social workers and other professionals in healthcare and human services.

### **Description:**

Neurodiversity-affirming care is not only about individual interactions; it is also a form of cultural competence embedded within professional practice. To be neurodiversity- and neurodivergent-affirming is to acknowledge that all brain types, including those that are different to what society considers the norm, are equal in value and valid in their right to exist without conforming. This means valuing an individual's strengths, understanding and accommodating their challenges, and accepting differences in social interaction, communication, behaviour, and learning.

This 1-day course is designed to provide a comprehensive introduction to a neuro-affirming practice framework and tools for integrating its principles when working with individuals, families, and groups. The course will balance theoretical learning with interactive discussions, case scenarios, and guided practice.

Participants will learn about neuro-affirming care, including the neurodiversity movement; neurodivergent diversity; neurodivergence and gender; neurodivergence across the lifespan; neuronormativity and systemic ableism; domains of experience; masking/camouflaging; neurodivergence and mental health; and neurodivergent-affirming communication. This learning will then be applied through guided practice activities and debriefing.

This course is the first of a three-part series on neurodiversity-affirming care, and a recommended pre-requisite for the following two courses<sup>1</sup>. In the event that a future certificate program in neurodiversity-

<sup>1</sup> Further information on courses 2 and 3 can be found at the end of this course description.

affirming care is developed, these courses will count toward the required hours for the completion of that program.

**Learning Objectives:**

1. Understand the core principles of a neuro-affirming conceptual practice framework.
2. Cultivate a neuro-affirming lens and bolster confidence in supporting neurodivergent individuals and their families.
3. Identify and apply specific strategies and techniques for implementing neuro-affirming care in practice.

**Learning Activities:**

- Lecture, practice examples, and skills teaching.
- Experiential learning through group discussions, activities, guided practice, and debriefing.

**Schedule:**

Time	Topic / Activity
10:00am – 10:30am	Introductions
10:30am – 11:30am	Neurodiversity and neurodivergence
11:30am – 12:00pm	Interactive activity
12:00pm – 1:00pm	Lunch
1:00pm – 1:30pm	Domains of experience
1:30pm – 2:00pm	Neurodivergence and mental health
2:00pm – 2:30pm	Interactive activity
2:30pm – 2:45pm	Break
2:45pm – 3:15pm	Neurodiversity-affirming practice framework
3:15pm – 4:45pm	Guided practice
4:45pm – 5:00pm	Debrief

**Facilitator: Erika Ono, PhD, RSW**

Dr. Erika Ono is a neurodivergent POC (she/her) who lives on the unceded traditional territories of the xʷməθkʷəy̓əm (Musqueam), Skwxwú7mesh (Squamish), and Selilwitulh (Tsleil-Waututh) Nations.

Erika is an Adjunct Professor in the School of Social Work and Clinical Instructor in the Department of Psychiatry at the University of British Columbia. She is a Social Work Clinician in the Neuropsychiatry Clinic at BC Children's Hospital, Evaluator at the Complex Developmental and Behavioural Conditions Program at Sunny Hill Health Centre, and Subject Matter Expert Consultant on Neurodivergent Mental Health Literacy for the Ministry of Children and Family Development's Child and Youth Mental Health Policy, Prevention and Early Intervention Team.

Her research explores the violence of care at the nexus of diverse-abilities, gender, race, and socioeconomic status, particularly in the ways that this manifests through policy and practice with families.

Subsequent courses planned as part of this three-part series:

**Course 2**

***Neurodiversity-Affirming Therapy: Mental Health Assessments***

This course will provide knowledge and skills for clinicians to increase their capacity to recognize and validate neurodivergent identities during the assessment and treatment planning stages of the therapeutic process, and distinguish these presentations from symptoms of DSM V mental health diagnoses.

**Course 3**

***Neurodiversity-Affirming Therapy: Adapting Treatment Approaches***

This course will emphasize the importance of embracing neurodivergence in clinical care and provide practical strategies to create more inclusive and supportive therapeutic environments. This course will explore evidence-informed modifications that can be made to certain therapeutic modalities in order to better meet the needs of neurodivergent clients.

*Cancellation Policy: Learners who need to cancel their registration for a course will be offered a 50% credit up to 14 days before scheduled course, which can subsequently be used for any other course in the Continuing Education and Certificate program. Please ensure that any cancellations are submitted to [sowk.coned@ubc.ca](mailto:sowk.coned@ubc.ca).*
